**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Malin et al. (Malin).

Malin discloses a system with a means for displaying an image (the monitor of the computer), repair-estimation time input (265), repair reserved data storage means (database 250), repair-reservable day/time data display means (the monitor of the computer), repair reservation determining means (resource queues 270), means for calculating a repair-reservable day/time (fig 1), the calculating means would be visible on the monitor, the system uses different criteria to calculate repair estimation time (265,270,275 and 280), the activities of a plurality of shops and bays is controlled and displayed (220), it would be inherent that if there was a problem the repair-reservation completion day/time could be changed, further, the actual time consumed on a task is recorded (page 5, paragraph 0050, line 12), while not discussed, it would be inherent that any time axis used would be universal throughout the system.

***Response to Arguments***

Applicant's arguments filed 10/08/03 have been fully considered but they are not persuasive. As to arguments that the prior art does not disclose the claimed "repair reservation determining means". This would be inherent in any business where a customer must make a reservation. For instance, they wouldn't make a reservation for Friday at 4pm if the shop closes at 5pm and the job will take 4 hours. The step could be merely mental and would meet the limitations as claimed. The means would be in the computer wherein the user would calculate the time necessary for the job, (times for repairs are generally standardized) and cross-correlating this information with shop hours, thus meeting the limitations as claimed. Further, while the applicant claims that storing time reservations in a database is different, it would appear to meet the limitations as claimed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
